## HOW TO UPDATE FIRMWARE - ANDROID DEVICE

This guides shows how to install the Sunrise OTA App and update firmware on your Curve LTG Treadmill.

Written By: Rogue Product Development

#### Step 1 — How to Update Firmware - Android Device

 Download the "anplus-ota" from play store and install to the cell phone or portable device with Bluetooth as shown. Make sure the cell phone or portable device can receive email as the update program will be sent to the email as a \*.bin format email attachment.

- Start walking on treadmill. Running belt MUST be moving at 2mph or higher during the entirety of the OTA update (4 Minutes) Keep walking.
- Press and hold (approximately 5 seconds) "-", "+" and "PAUSE/STOP" key at the same time to enter the OTA update mode as shown in Image 2, Lettering "OTA" and Bluetooth icon shows on the screen as shown in Image OR screen will be flashing.

#### Step 3

• Open the App on your mobile device and click the "START " button to enter the OTA process.

#### Step 4

- Click the "Start to Load" button.
- If your Inbox appears empty, you will need to import the updated file into the inbox now.
- Open your email app on the cell phone or portable device, locate the email with the \*.bin attachment. Click the attachment (Image 2) then long press the \*.bin attachment to show "save" option, then click "Save" to save to the cell phone or portable device.

### Step 6

 Select the directory and click the "SAVE" key to save the update file for later access

#### Step 7

- Click the "Start to Update" button, the app will begin displaying progress. Wait for roughly 3 minutes and make sure the Console is in power.
- When the app shows "100%" updated, the screen jumps back to the original screen from Step 3, meanwhile the console beeps and automatically restarts.
- Firmware update is complete
